The world in a room

EXHIBITION

A revolutionary exhibition revealing how African, Islamic, Russian, Pacific and Chinese art shaped Henri Matisse's artistic language.

For the first time, without simplifications, discover the profound relationship between Matisse and the cultures encountered in his travels, which redefined the boundaries of Western modernism.

Around 100 works including paintings, sculptures and masterpieces such as Jazz and Océanie, in a journey that reinterprets art through a postcolonial perspective.
